Your hearing • Our passion

# The Times Are All RITE

**How would you make a successful product even more successful? By expanding its range, for example, with the new Chronos Nano RITE. The receiver-in-the-ear model enhances the Chronos product family to meet your customers' demanding needs. Not only is the Chronos Nano RITE equipped with our new Audio Efficiency™ technology combining the latest speech and comfort features; the Chronos Nano RITE also accounts for more fitting and acoustic options. Not to mention style – attractive in both its smallness and smart look.**

## A lightweight powerhouse that delivers exceptional accuracy

To offer you more fitting flexibility and personalization options the Chronos Nano RITE is equipped with:

- a telecoil;
- Auto Telephone (detection);
- a hydrophobic coated housing;
- and comprehensive Bluetooth® wireless connectivity.

Robust and available in 4 lengths, the Chronos Nano RITE's new speaker set comprises 2 units: the M-speaker, appropriate for mild to moderately severe, and the P-speaker – with additional power – for moderate to severe hearing loss. While the choice of custom molds allows for a customized fit, instant domes contribute to a first-fit success. Now both the Open Dome and Power Dome come in an even smaller 6 mm size.

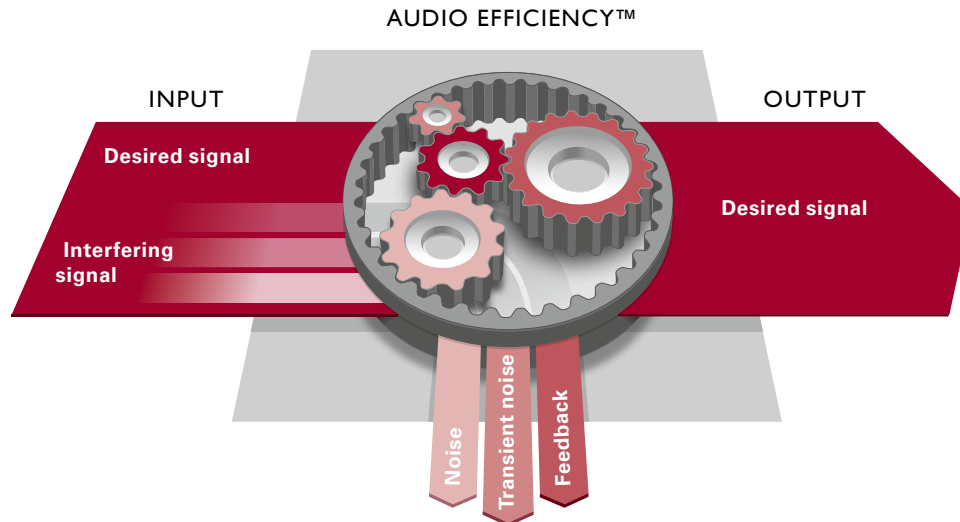

## Technology with style

The new Chronos Nano RITE is available in 11 stylish colors, including burgundy featuring a golden swing line. The Chronos family's 6 ITE and 5 BTE models are offered in color varieties that blend well with your customers' hair and skin tone.

## High scores in speech understanding, comfort, and convenience

Audio Efficiency™ ensures the smooth operation of the most sophisticated speech and comfort features combined in all hearing solutions of the Chronos family. This new technology eliminates all unwanted parts of a signal to single out precisely what your customers want to hear. Speech is clear, comfort ubiquitous.

- **ChannelFree™** seeks out speech cues at a rate of 20,000 times per second, thus amplifying even the smallest units and softest parts of speech.
- The **Adaptive Feedback Canceller Plus** identifies and suppresses whistling- and feedback-like sounds before they can become audible.
- **Transient Noise Reduction** cushions impulse noise. It eliminates unpleasant sounds, e.g. rattling silverware, without affecting the clarity and quality of speech.
- **True Directionality™** provides a greater sense of one's surroundings by reproducing the outer ear's ability to filter low- and high-pitched sounds.

## Convenience and comfort with wireless accessories

The key to comprehensive wireless connectivity and mobile communication is SoundGate, an easy-to-use interface between Chronos hearing solutions and external audio sources, such as cellular and landline phones, computers, TV sets, and music players. Accessories for Bluetooth® wireless connectivity include:

**RC-P** – remote control

**SoundGate** – interface for wireless connectivity

**TV adapter** – for wireless reception of TV signals

**Phone adapter** – wireless link to landline phones
